

We build the systems governments run on.

Licensing, registries, workflows, payroll and document AI - live for a national government in the Caribbean, and built to be handed over.

The delivery record

National Business Licence Platform - ~300 activities. One process.

Taxi & Tour Operator Licensing Registry - Months to days

WAVE Workforce & Payroll Platform - Five reports to one

Trade & CSME Paperwork Automation - Weeks to minutes

Statutory Reporting for a National Social Security Fund - Two months to minutes

Renewable Energy Interconnection Approvals - 90% less review time

National Festival Accreditation - Workflow to credential

Government of St. Kitts & Nevis. Engagements described by function. References available on request.

Five engines. Shared foundations.

Registry & Licensing

One application. Every requirement. A decision you can trace.

Workflow & Referral Routing

Across agencies. In parallel. With a clock on every step.

Document Intelligence

The model flags. A named officer decides.

Workforce (WAVE)

Payroll, people and reporting, on a stable rules base.

Analytics & Plain-English Query

One executive view. The source behind every figure.

One project. Delivered.

Scope first, then costing in your tender format. Working previews, user acceptance, rehearsed migration, go-live support, role-based training and complete handover.

100 percent of source code, data, documentation and runbooks handed over. Your own cloud account or agreed Caribbean-resident infrastructure.
